Thank you for visiting Horikan Tattoo

<About price>

Basically the price starts from 3000 Yen. It can be adjusted according to size and time.

*Size of the name card – 15,000 Yen

*Size bigger than the name card – 15,000 Yen per hour

You have to pay before the works started.

In case of reservation, you have to pay for one hours (15,000 yen) for reservation fee. However, it includes tattoo fees. So when you visit, you can get discount of 15,000 yen.

In case of refund, it is unable if you cancel reservation after finished discussion with us.

<After Care>

Just after got tattoo, to avoid being touched with dirt, or toxic gas, we wrap the area you get tattoo. Please pay attention to do not take off wrapping during 1-2 hours after you got tattoo.

After 1-2 hours, take off wrapping carefully, and washed the area of tattoo softly with tepid(lukewarm) water.

After washing, please put on ointment overall part of your tattoo.

Here is our recommendation of ointment. (You can buy those things in drug store easily)

1. Flucort(Hooroo-goto)
2. Teracort(Tera-goto) made by Haiza.cop
3. Teramasin made by Haiza.cop
4. Torumasin made by Zaria.cop

*For detail, size and strength of ointment is in inverse proportion.

*The strength of ointment has following above number.

It is important that keep your part of tattoo not to be dried, so please put on ointment when you think the part is getting dry. Our recommendation is put on ointment one time per 3-4 hours. Also, you have to put on ointment 2-3weeks after you got tattoo.

*After you got tattoo, it seems like having scab after 1-2weeks. **PLEASE**, do not take it off by yourself. It is natural phenomenon, and you must keep it until your scab has been taken off naturally.

<For our Sanitation>

All tools include machine, needles, grip-tube, ink, and ink cap, used during works are managed in a sanitary way by not reusing those things. Every works started with new tools.

When using ink, we use antiseptic water to avoid in case of ink spread, contamination.

The place you get tattoo is also managed in a sanitary way to avoid infection.

Because all tattoo works are progressed manually, all tools include gloves, vinyl, and even hands are managed in a sanitary way too.

During tattoo works, it is accompanied with bleeding. However, we keep an aseptic condition, to make you do not need to worry about HIV, Hepatitis B, Hepatitis C, etc.

(Also, you are not allowed to smoke in the place get tattoos, because of sanitation reason.)
